Academic Discipline

☐ Does the discipline require frequent face-to-face interaction or can tasks be effectively completed online?

☐ Are there specific skills or hands-on experiences in this field that would be difficult to replicate in an online environment?

Type of Partner Organization

☐ Does the organization have a robust digital infrastructure to support remote work, including secure communication and collaboration tools?

☐ Would the organization benefit from working with interns from different geographical regions to address specific skill gaps?

☐ Are there departments or roles within the organization that are better-suited to remote interns?

Learning Outcomes

☐ Which competencies does the organization aim to develop in interns, and can these be effectively fostered in a virtual setting (e.g., digital communication, proactivity, time management)?

☐ Are there specific skills, such as teamwork, creativity, or networking, that might be more challenging to cultivate purely online?

☐ Can the organization effectively measure the capacity of the virtual internships in fostering the intended learning outcomes?

Legal and Financial Aspects

☐ Is the organization prepared to provide necessary home office resources, such as IT equipment, software, internet, and ergonomic furniture?

☐ What insurance provisions are in place to cover home office accidents, equipment damage, or cyber-security incidents for remote interns?

☐ Are there perks or allowances (e.g., coffee breaks, equipment funds) that the organization is willing to extend to remote interns?

☐ Has the organization considered implementing a work-hour tracking system to ensure accountability for remote work?
